SUMMARY

Passionate full stack developer with strong understanding of programming standards and best practices, implementation of functionality enhancements, and customer needs. Eager to challenge myself in an environment where innovation, creativity, and education are valued. Demonstrated experience with troubleshooting, problem solving, and quality assurance. Quick learner with excellent collaboration and communication skills.

EXPERIENCE

De La Rue

January 2022 - October 2022

Junior Software Engineer III

(laid off, see last bullet point)

- Oversaw writing, refactoring, testing, and coordinating code review for the Traceology application
- Wrote unit tests for front and backend, along with testing in localhost and test environments
- Formerly responsible for deploying code to our test and production environments
- Utilized figma designs to improve the frontend look and feel, and updated the Traceology track and trace web application to be fully responsive
- Created new controllers and models, wrote API calls, and managed database migrations
- Laid off due to company wide layoffs and not work ethic, can provide letter from Jill Reeder (HR)

NXTsoft

May 2021 - January 2022

Software Engineer I

- Wrote and implemented OpenAPI, design, code, and delivered solutions for three fintech web applications
- Updated and debugged three mobile banking and payment applications and developed their redocly API documentation site
- Used Angular 9 and typescript for the frontend along with creating and utilizing various components
- Collaborated with the team to provide the best results with the fastest turnaround time

Valor Systems

February 2021 - May 2022

Software Developer Contractor

- Created a client page to display information on work they were collaborating on for an upcoming project
- Used the style guide and other pages to keep the new client page on brand
- Drew up wireframes to discuss and align on layout and features
